

**FOR IMMEDIATE RELEASE**

### **SARK and VTech Announce Interoperability**

**21st July 2016, London** – SARK IP PBXs, exclusively distributed in the UK by ProVu Communications, now offer full Zero-Touch support for the VTech ErisTerminal SIP phone range. Simply enable SARK's Zero-Touch function, and then connect VTech VSP715A, VSP725A, VSP735A or VSP600A endpoints"with new models VSP716A, VSP726A and VSP736A due to be added soon".

Each one is allocated an extension number and a login to the central phonebook, and the configuration is automatically pushed out to the phones. Such seamless integration saves time and eliminates errors during installation. It is then a simple job for the installer to make further customisation to each handset according to their users' needs, adding features such as speed dials, BLFs and other function keys.

Charles Williams, VTech's EMEA Sales Director, commented "Partnerships like this really help to build confidence with resellers; when both the SIP phone and PBX manufacturer have worked together to establish interoperability and to ensure that everything works together, then you can have real peace of mind. The way that SARK PBXs handle the set up process with the VTech phones is so simple and straightforward that you can deploy a large number of phones in minutes."

For more information on SARK please call Provu on **01484 840048** or visit their website **[www.provu.co.uk](http://www.provu.co.uk)** for more details.
