VTech Strengthens Portfolio of SIP Telephony Solutions for Workplace Communications

New SIP Conference Phone with Wireless Mics Provides Additional Features and Flexibility for Businesses of All Sizes

The ability to communicate effectively is critical in a business setting, making a company's telephony infrastructure an important aspect of a working environment. To continue to meet modern business needs, today VTech Communications, Inc., a wholly owned subsidiary of VTech Holdings Limited (HKSE: 303), announced a new addition to the lineup of SIP business phones, an innovative ErisStation™ SIP conference phone – VCS754A.

"Every business is different and requires a diverse set of features and functions to address its unique workplace communication needs," said Charles Williams, Sales Director, Business Phones Division, VTech Communications. "One telephony solution won't fit all, which is exactly why we're continuing to bolster our portfolio of business phone solutions with products that address the ever-changing needs of businesses of all sizes."

VTech's business phone line includes new budget-friendly, feature-rich products:

- **ErisStation™ SIP Conference Phone with Four Wireless Mics (VCS754A)** – For businesses that already have SIP telephony solutions in place or are looking to migrate over, they now have the option to extend coverage to the conference room with this solution that supports up to three SIP lines. Complete with four DECT wireless microphones, the SIP conference phone allows meeting participants to spread out and speak without having to raise their voices. With G.722 wideband codec support for HD audio, sound quality is rich and life-like, ensuring every word of every call is heard crystal clear.
