ErisTerminal® SIP Deskset
VSP726A
User Guide
Congratulations on your purchase of this VTech product. Before using this product, please read **Important Safety Information** on page 4 of this manual. Please thoroughly read this user’s manual for all the feature operations and troubleshooting information necessary to install and operate your product. For customer service or warranty service, please contact our regional offices or distributors in the country or region where you purchased your product.

Please note the serial number of your product, which can be found on the back of the deskset. Save your sales receipt and original packaging in case it is necessary to return your telephone for warranty service.
Important Safety Information

This symbol is to alert you to important operating or servicing instructions that may appear in this user’s manual. Always follow basic safety precautions when using this product to reduce the risk of injury, fire, or electric shock.

Important safety instructions

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury, including the following:

1. This product should be installed by a qualified technician.
2. This product should only be connected to the host equipment and never directly to the network such as Public Switch Telephone Network (PSTN) or Plain Old Telephone Services (POTS).
3. Read and understand all instructions.
4. Follow all warnings and instructions marked on the product.
5. Unplug this product from the wall outlet before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.
6. Do not use this product near water such as near a bath tub, wash bowl, kitchen sink, laundry tub or swimming pool, or in a wet basement or shower.
7. Do not place this product on an unstable table, shelf, stand or other unstable surfaces.
8. Slots and openings in the back or bottom of the telephone base and handset are provided for ventilation. To protect them from overheating, these openings must not be blocked by placing the product on a soft surface such as a bed, sofa or rug. This product should never be placed near or over a radiator or heat register. This product should not be placed in any area where proper ventilation is not provided.
9. This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied at the premises, consult your dealer or local power company.
10. Do not allow anything to rest on the power cord. Do not install this product where the cord may be walked on.
11. Never push objects of any kind into this product through the slots in the telephone base or handset because they may touch dangerous voltage points or create a short circuit. Never spill liquid of any kind on the product.
12. To reduce the risk of electric shock, do not disassemble this product, but take it to an authorised service facility. Opening or removing parts of the telephone base or handset other than specified access doors may expose you to dangerous voltages or other risks. Incorrect reassembling can cause electric shock when the product is subsequently used.

13. Do not overload wall outlets and extension cords.

14. Unplug this product from the wall outlet and refer servicing to an authorised service facility under the following conditions:
   A. When the power supply cord or plug is damaged or frayed.
   B. If liquid has been spilled onto the product.
   C. If the product has been exposed to rain or water.
   D. If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operation instructions. Improper adjustment of other controls may result in damage and often requires extensive work by an authorised technician to restore the product to normal operation.
   E. If the product has been dropped and the telephone base and/or handset has been damaged.
   F. If the product exhibits a distinct change in performance.

15. Avoid using a telephone (other than cordless) during an electrical storm. There is a remote risk of electric shock from lightning.

16. Do not use the telephone to report a gas leak in the vicinity of the leak. Under certain circumstances, a spark may be created when the adapter is plugged into the power outlet, or when the handset is replaced in its cradle. This is a common event associated with the closing of any electrical circuit. The user should not plug the phone into a power outlet, and should not put a charged handset into the cradle, if the phone is located in an environment containing concentrations of flammable or flame-supporting gases, unless there is adequate ventilation. A spark in such an environment could create a fire or explosion. Such environments might include: medical use of oxygen without adequate ventilation; industrial gases (cleaning solvents; gasoline vapours; etc.); a leak of natural gas; etc.

17. Only put the handset of your telephone next to your ear when it is in normal talk mode.

18. The power adapters are intended to be correctly oriented in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a ceiling, under-the-table or cabinet outlet.

19. Use only the power cord indicated in this manual.
20. For pluggable equipment, the socket-outlet shall be installed near the equipment and shall be easily accessible.

21. In wall mounting position, make sure to mount the telephone base on the wall by aligning the eyelets with the mounting studs of the wall plate. Then slide the telephone base down on both mounting studs until it locks into place. Refer to the full instructions in **Deskset Installation** in this user guide.

22. **CAUTION:** Keep small metallic objects such as pins and staples away from the handset receiver.

**SAVE THESE INSTRUCTIONS**

**Declaration of Conformity**

Hereby, VTech declares that this VSP726A is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

Introduction

This user’s manual contains detailed instructions for using your VSP726A deskset. Please read this user’s manual before using your telephone.

Deskset features

The VTech VSP726A deskset is full-featured SIP endpoint business phone designed to work with popular hosted IP PBX services and on-premise SIP PBXs. Once you have ordered and configured your PBX service, the deskset enables you to make and receive calls as you would with any other business phone. The deskset provides calling features such as hold, transfer, conferencing, speakerphone, quick-dial numbers and one-touch voicemail access.

There are two ports, known as the Ethernet port and PC port, at the back of the deskset. The Ethernet port allows the VSP726A deskset to connect to the hosted IP PBX via a router. The PC port is for another device such as a personal computer to connect to the local area network through the deskset.

The VSP726A deskset supports paging and call transfers between system extensions and can connect you and two other parties on the same conference call.

The slot on the back of the phone accepts a micro SD card. The SD card allows call recording, if your administrator has enabled this feature.

The telephone also has 12 dual-function programmable keys. You or your system administrator can program these keys for functions such as quick dial, redial, Do Not Disturb, call forwarding, message retrieval, and call parking.

The keys can also be programmed to monitor other desksets in the system. You can press the key for a monitored extension to answer a call at your own deskset. The programmable keys have two-color LEDs to indicate call activity. For more information about the programmable keys, see page 11.

The VSP726A IP Phone Features include:

- Backlit Liquid Crystal Display
- Speakerphone, Hold and Mute
- Up to 4 lines
- Up to 8 active calls
- 3-way conferencing
- 12 dual-function programmable keys
- Message Waiting alert LED
- Dual GigE Ethernet ports
- Power over Ethernet enabled
- DECT cordless headset and corded headset support
- 1000-entry local directory
- MicroSD card slot and call recording
Quick Reference Guide

Front panel features

**MESSAGE WAITING indicator**
Illuminates when you have a new voice message.

**Programmable keys**
Can be programmed to perform various functions or access various features. For example:
- Press to access a line to make a call.
- Press to dial a monitored extension or a quick-dial number.
- Press to turn a feature such as Do Not Disturb on and off.

**Key label card**
To write on the key label card, pull out the card from under the plastic cover.

**LOWER**
Press to access the second level (alternate function) of a programmable key.

**Corded headset input** (on side)

**SPEAKER**
Press to turn the speakerphone on or off

**SCREEN**
Displays call information, soft key labels, and deskset menus.

**MENU**
Press to display the deskset menu.

**SELECT**
Press to select a menu item.

**MIC**

**SCREEN**
Displays call information, soft key labels, and deskset menus.

**MENU**
Press to display the deskset menu.

**SELECT**
Press to select a menu item.

**SOFT KEYS**
Perform different actions depending on the on-screen labels.

**HOLD**
Press to put a call on hold.

**CANCEL**
While in a menu, press to cancel an operation and exit the menu.

**NAVIGATION KEY**
While in menus, press ▼ or ▲ to scroll through the menu, highlight items or change settings. While entering names, numbers or other text, press ◀ or ▶ to move the cursor left or right.
Quick Reference Guide

Dial pad and audio keys

Dial pad
Use to dial numbers and enter text. For a list of special characters you can enter with the dial pad, see page 80.

MUTE
During a call, press to prevent your voice from being heard.

VOLUME
• During a call, press to adjust the listening volume.
• During message playback, press to adjust the playback volume.
• When the phone is idle, press to adjust the ringer volume.

HEADSET
When a headset is connected to the deskset, press to make, answer, or hang up a call.

Programmable keys

The table below lists the default settings for the programmable keys. The key assignments on your phone may be different. Ask your system administrator about your phone’s programmable key configuration. For the complete list of programmable key options, see “Programmable Feature Keys” on page 66.

* Your system administrator can assign more than one key to a line. For example, you might be able to activate Line 1 with keys 1 and 2, and Line 2 with keys 3 and 4. Consult your administrator regarding your phone’s line configuration.
Deskset Installation

Overview

This section assumes that your network infrastructure is established and that your IP PBX service has been ordered and configured for your location.

Install the phone close to a router or network switch. You can power the phone using the supplied power adapter or Power over Ethernet (PoE—Class 3). If you are not using PoE, install the phone near a power outlet not controlled by a wall switch. The phone can be placed on a flat surface or vertically mounted on the wall.

For customer service or product information, please contact your distributor or dealer.

Network requirements

A switched network topology is recommended for your LAN. The office LAN infrastructure should use Cat.-5/Cat.-5e cable.

The LAN connections to the deskset(s) should all be wired. However, wireless connections to other devices (such as laptops) in your office will not impede performance.

All desksets must reside on a single subnet. A Dynamic Host Configuration Protocol (DHCP) server is recommended and must be on the same subnet as the desksets so that IP addresses can be auto-assigned. In most cases, your network router will have a DHCP server. By default, the deskset has DHCP enabled for automatic IP address assignment.

Note: Some DHCP servers have default settings that limit the number of network IP addresses assigned to devices on the network. You should log in to your server to confirm that the IP range is sufficient.

If no DHCP server is present, you can assign static IPs to desksets. You can assign a static IP address using the deskset menus. Go to Admin settings > Network setting > IPv4/IPv6 > Set static IP. See the Administrator and Provisioning Guide for more information. If you do not have a DHCP server or do not manually assign static IPs, you will not be able to access the WebUI and/or enable automatic time updates from an NTP server.

A DNS server is recommended to resolve the path to the Internet and to a server for firmware and configuration updates. If necessary, the system administrator can also download upgrade files and use the WebUI to update the deskset firmware and/or configuration settings manually.
Location

Avoid placing the deskset too close to:

- Communication devices such as television sets, DVD players, or other cordless telephones
- Excessive heat sources
- Noise sources such as a window with traffic outside, motors, microwave ovens, refrigerators, or fluorescent lighting
- Excessive dust sources such as a workshop or garage
- Excessive moisture
- Extremely low temperature
- Mechanical vibration or shock such as on top of a washing machine or work bench
Deskset Installation

Rear panel features

Connecting the phone

**IMPORTANT INFORMATION**

1. If you do not connect the deskset to a PoE-capable network router or switch, use only a compatible VTech power adapter (purchased separately from your distributor or dealer).

2. The power adapter is intended to be correctly oriented in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a ceiling, under-the-table or cabinet outlet.

**To install the phone:**

1. If you plan to place the phone on a flat surface, attach the stand. Line up the tabs on the stand with the slots on the rear of the phone. Two sets of slots allow you to attach the stand at either a 45-degree or 35-degree angle.

2. Plug the end of the coiled handset cord into the Handset jack on the rear of the phone. Secure the cord by routing it through the slot and underneath the tab.
3. Plug one end of the Ethernet cable into the Ethernet port on the rear of the deskset (marked by \[\text{Ethernet Port}\]), and plug the other end of the cable into your network router or switch.

**Note:** You may need to use a network switch connected to your router if your router does not have sufficient ports for the number of phones you want to install. If you use a network switch, connect the phone to the switch instead of the router in the previous step.

4. If the deskset is not using power from a PoE-capable network router or switch:
   a. Connect a power adapter to the deskset power jack.
   b. Plug the power adapter into an electrical outlet not controlled by a wall switch.

If there is a networked computer and no extra Ethernet wall jacks near the phone, then the phone and PC can share the same network connection.

**To share a network connection with a PC:**

1. Plug a Cat.-5 Ethernet cable into the PC port on the phone (marked by \[\text{PC}\]).
2. Plug the other end of the Cat.-5 Ethernet cable into the computer's Ethernet port.
   
   • If a PC is connected to your network through a phone, any phone resets and power or network interruptions will disrupt the PC’s connection to the network.

To insert a microSD card (optional):

1. Release the microSD card cover and swivel it out of the way.
2. Insert a microSD card (oriented as shown on the phone), pressing it down with a fingernail until it clicks into place.
Deskset Installation

To mount the phone on the wall:

1. Prepare the wall-mount screws. The deskset will fit onto wall-mount screws with centers 3 ¼ inches (8.2 cm) or 4 inches (10.2 cm) apart. Most standard wall plates have screw centers 3 ¼ inches (8.2 cm) apart.

2. Put the corded handset aside. Use a screwdriver or coin to rotate the handset tab 180 degrees. The protruding edge of the tab holds the corded handset when the phone is mounted on the wall.

3. Connect the network cable(s) and, if required, the power adapter.

4. Place the deskset base over the mounting screws. Align the upper wall mounting hole on the back of the phone with the upper mounting screw. Make sure the lower wall mounting hole on the phone also aligns with the lower mounting screw.

5. Slide the deskset base down over the mounting screws.

6. Bundle the network cable(s) and power adapter cord (if using the power adapter) neatly with twist ties.
Using the Phone

Idle screen

The Idle screen appears after the phone is connected and configured for your SIP PBX service. The Idle screen indicates that you have no active or held calls.

From the Idle screen, you can press:

- **Directory** to view the directories that are available to you. See “Using the local directory” on page 39.
- **Line** to select another line (SIP Account). When you make a call, the phone will use this line. See “Making calls” on page 19. **Note:** Line appears only if more than one SIP account is registered to your phone.
- **Call Log** to view the phone’s call history. See “Call history” on page 42.

Note that the default Idle screen soft keys are shown above. Your phone’s soft keys are programmable and may differ from what is shown here.

Idle mode screen icons

In idle mode, the following screen icons indicate your phone’s current settings.

<table>
<thead>
<tr>
<th>Icon</th>

Using the menu

1. Press **MENU** to show the main menu.
2. Press ▼ or ▲ to highlight menu items.
3. Press **SELECT** or a corresponding dial pad key to select a highlighted menu item. For example, when Features is highlighted, you can press **SELECT** or you can press 1 on the dial pad to view the Features submenu.
4. Press **SELECT** or an appropriate soft key to save changes.
5. Press **CANCEL** to stop an operation, exit a menu or return to the idle screen.
Using the Phone

Main menu items

1. Features (see page 34)  3. User Settings (see page 53)
2. Status (see page 52)   4. Admin Settings (available only to your system administrator)

Making calls

You can make a call at any time by choosing an off-hook method (such as lifting the handset, pressing a Line key, or pressing HEADSET or SPEAKER), and then dialling a number. When the phone is in idle mode or has calls on hold, you can make a call by pre-dialling a phone number and then going off hook to call the number.

To go off hook and make a call:

1. To use the default line, lift the handset, press HEADSET, or press SPEAKER. To use a specific line, press a Line key. You hear a dial tone.
2. Use the key pad to enter the desired phone number.

   Line 1
   2325550178

   Backspc  123  Dial

   • Press Backspc if you enter an incorrect digit.
   • Press 123 to change from entering digits to entering letters (if you need to enter a domain name as part of the number).
3. Press Dial, or, if the phone accepts the number as valid, it dials the number after a short delay.

   Line 1
   Calling
   2325550178

   End

Note that the default live dial soft keys are shown above. Your phone’s soft keys are programmable and may differ from what is shown here.

If Hotline is enabled, then the phone will automatically dial a pre-programmed number after going off hook.
Using the Phone

Making calls (continued)

To make a call by pre-dialling:

1. Use the key pad to enter the desired phone number.

   - Press Backspc if you enter an incorrect digit.
   - Press 123 to change from entering digits to entering letters (if you need to enter a domain name as part of the number).

2. Dial the number by:
   - Pressing Dial. The phone will use the preferred audio mode (speaker or headset) until you lift the handset.
   - Lifting the handset.
   - Pressing the desired Line key.
   - Pressing SPEAKER or HEADSET.

When the call is answered, the active call screen appears.

   Line 1
   2325550178
   Backspc  123  Dial

To end the call, hang up or press End. If you are on speakerphone and the handset is “on hook,” press SPEAKER to end your call.

Note that the default active call screen soft keys are shown above. Your phone’s soft keys are programmable and may differ from what is shown here.

To make a call using quick dial:

- Press the desired quick dial programmable key.
- or-

Press and hold a dial pad key that matches the number of the desired speed dial entry. For example, to dial speed dial entry 4, press and hold 4 on the dial pad. See “Phone Features” on page 45.
Using the Phone

Answering calls

To answer a call:

• Lift the handset, or press Answer, SPEAKER, or HEADSET.

You can also press a flashing green Line key to answer that incoming call.

If you have multiple incoming calls, (as indicated by \(|/\) ), press ▼ or ▲ to select the call you want to answer.

On the incoming call screen, you can also press:

• Reject to terminate the incoming call.
• Forward to forward the call to another number.

If you don’t respond to an incoming call, the phone displays a missed-call alert screen.

If a missed call alert screen appears, you can press:

• Exit to return to the Idle screen.
• Callback to immediately dial the caller’s number.
• View to see the caller’s information in the call history.
Using the Phone

Putting a call on hold

Use this feature to hold one call while you access another. The deskset also puts calls on hold automatically when you answer another call, transfer a call, or create a conference.

See also, “Putting a shared-line call on hold” on page 30.

To put a call on hold:

• During a call, press HOLD on the deskset.

  The On hold screen appears. The programmable key for that line flashes green slowly.

  ![On hold screen example]

From the On hold screen, you can press:

• End to end the call.
• New to dial a new call.
• Resume to take the call off hold.
• Transfer to transfer the held call to another party.
• Conf to start a conference with the held call.

Note that the default On hold screen soft keys are shown above. Your phone’s soft keys are programmable and may differ from what is shown here.

If another party puts you on hold, you may see the message Held by far end. This message depends on compatibility between phones and PBX types, and may not always appear. You can press End to end the call.

![Held by far end screen example]
Using the Phone

Forwarding calls

You can forward an incoming call to another number, either by entering the number yourself, or by selecting a number from the directory, redial list, or call history.

**Note:** Your deskset Call Forward–No Answer setting will cancel the manual forwarding process if it takes effect first. For example, your deskset may be set to forward calls to voicemail after a call rings for 10 seconds, before you can reach the deskset to forward the call yourself. If you have problems forwarding calls because of the Call Forward–No Answer setting, ask your system administrator to extend your Call Forward–No Answer delay.

See also “Using the Call menu” on page 35.

**To forward a call using manual entry:**

1. When an incoming call appears, press \(\text{Forward}\).
   The deskset stops ringing and the **Forward to** screen appears.

   ![Forward to screen](image)

   If you press \(\text{Cancel}\), the deskset begins ringing again and the incoming call screen reappears.

2. Enter the number to which you want to forward the call.

   ![Enter number](image)

3. Press \(\text{Forward}\). Your phone returns to idle mode if you have no other active calls.
Using the Phone

Forwarding calls (continued)

To forward a call using the directory, redial list, or call history:

1. When an incoming call appears, press Forward.
   The deskset stops ringing and the Forward to screen appears.

   2. Press a programmable key (if available) to display the directory, redial list, or call history. You can also navigate to the call history or directory using the deskset Features menu.

   3. If necessary, press \ or \ until Dial appears and then press Dial to forward the call to the number. Your phone returns to idle mode if you have no other active calls.
Using the Phone

Transferring calls

You can transfer a call to someone else at another phone.

If you talk to the transfer recipient before completing the transfer, you are making a “supervised” transfer.

However, the transfer recipient does not have to talk to you before receiving the transferred call. If you do not talk to the transfer recipient before transferring the call, you are making a “blind” transfer.

You can also transfer a call to a held call.

To transfer a call (supervised):

1. During a call, press Transfer . The call is automatically put on hold and the transfer setup screen appears.

   Line 1 1/1
   On a call 0:00:28
   2325550178
   End  Transfer  Conf

   Line 1 2/2
   Transfer to:
   123
   Cancel

   The Call transferred screen appears, and your phone returns to idle mode.

   Call transferred.

To cancel the transfer, press:

- Cancel on the transfer setup screen. The active call screen reappears.
- End when the second call is active. You will hang up on the second call.
Using the Phone

Transferring calls (continued)

To transfer a call (blind):

1. During a call, press Transfer. The call is automatically put on hold and the transfer setup screen appears.

   ![Transfer Screen Example]

2. On the transfer setup screen, enter the number to which you want to transfer the call.

   **Note:** To change the input method (for example, enter letters instead of numbers), press ▼ or ▲ to view the next set of soft keys.

   ![Soft Key Selection Example]

   The Call transferred screen appears, and your phone returns to idle mode.

   ![Call Transferred Screen Example]

   If the blind transfer fails, then the transferred call will ring your phone back.

To transfer a call to a held call:

1. While on a call with another call on hold, press Transfer.

2. The active call is automatically put on hold, and the Transfer to screen appears, showing the held calls and a “new call” option. Selecting A new call displays the transfer setup screen shown in the previous two procedures.

   ![Transfer to Screen Example]

3. On the Transfer to screen, select the desired held call, and then press Select. Your first call is immediately transferred to the selected held call.

   The Call transferred screen appears, and your phone returns to idle mode.

   ![Call Transferred Screen Example]
Using the Phone

Making a conference call

You can hold a conference call between yourself and two other callers.

To make a conference call:

1. During a call, press **Conf**. The call is automatically put on hold and the conference setup screen appears.

   ![Conference Setup Screen](image)

   - **Line 1** 1/1
   - **On a call** 0:00:28
   - **2325550178**
   - **End** **Transfer** **Conf**

   ![Conference Call](image)

   - **Line 1** 2/2
   - **Conference with:**
   - **Cancel** 123

2. Dial the second number for the other party you want to join your conference. You can also use a number from a list, such as the Directory or Call History.

3. When the second call is established, press **Conf**. The conference begins and the conference screen appears.

   ![Conference Call](image)

   - **Line 1** 2/2
   - **On a call** 0:00:04
   - **2325557018**
   - **End** **Conf**

   ![Conference Call](image)

   - **Line 1**
   - **Conference** 0:01:08
   - **End** **Split** **Bridge**

To cancel the conference setup, press:

- **Cancel** on the conference setup screen. The active call screen reappears.
- **End** when the second call is established. You will hang up on the second call and return to your first call.
- **CANCEL** when the second call is established. You will remain on the second call and your first call remains on hold.
Using the Phone

Making a conference call (continued)

When you have an active call and a held call, you can also create a conference with the held call.

To create a conference with a held call:

1. While on a call with another call on hold, press [Conf].
2. The active call is automatically put on hold, and the **Conf. with target** screen appears, showing the held calls and a “new call” option. Selecting **A new call** displays the conference setup screen shown in the previous procedure.

   ![Conf. with target screen](image)

   - **Conf. with target**
   - **A new call**
   - **2325550187**
   - **1/2**
   - **Back**
   - **Select**

3. On the **Conf. with target** screen, select the desired held call, and then press **Select**. You are immediately placed into a conference with your first call and the selected held call.

   ![Conf. setup screen](image)

   - **Line 1**
   - **Conference**
   - **0:01:08**
   - **End**
   - **Split**
   - **Bridge**

To end a conference call:

Press one of the following soft keys:

- **End**, which hangs up on both calls.
- **Split**, which puts both calls on hold. The screen shows information for the second call.
- **Bridge**, which joins both calls and returns your phone to idle mode.

Setting up a Network Conference:

A Network Conference is hosted by your service provider and allows multiple parties to join a conference. A Network Conference works in a similar way to the regular conference described above, except that the **Split** and **Bridge** functions are not available.

In addition, the soft keys **Add** and/or **AddCall** will appear during a conference, allowing you to add more parties to the ongoing conference call.
Using the Phone

Retrieving messages

The phone alerts you when you have a new message. The Message Waiting indicator also turns on whenever you have new messages.

<table>
<thead>
<tr>
<th>Wed Sep 08 11:09am</th>
<th>New Message</th>
</tr>
</thead>
<tbody>
<tr>
<td>Exit</td>
<td>View</td>
</tr>
</tbody>
</table>

On the New Message alert screen, you can press:
- **Exit** to return to the Idle screen.
- **View** to access your messages. The Message menu appears.

<table>
<thead>
<tr>
<th>Message menu</th>
</tr>
</thead>
<tbody>
<tr>
<td>LINE 1</td>
</tr>
<tr>
<td>LINE 2</td>
</tr>
<tr>
<td>LINE 3</td>
</tr>
</tbody>
</table>

The Message menu displays the mailboxes you can access from your phone. If your phone has more than one line, you may be able to access multiple mailboxes. Press ↑ or ↓ to highlight the desired mailbox and press SELECT to access messages in that mailbox.

When there is no New Message alert screen, you can access the Message menu using the deskset menu.

**To view the Message menu:**
1. When the phone is idle, press **Menu**.
2. With **Features** highlighted, press **SELECT**.
3. Press ↓ to highlight **Message**, and then press **SELECT**.

<table>
<thead>
<tr>
<th>Features menu</th>
</tr>
</thead>
<tbody>
<tr>
<td>2. Directory</td>
</tr>
<tr>
<td>3. Call history</td>
</tr>
<tr>
<td>4. Message</td>
</tr>
</tbody>
</table>

The Message menu appears.

<table>
<thead>
<tr>
<th>Message menu</th>
</tr>
</thead>
<tbody>
<tr>
<td>LINE 1</td>
</tr>
<tr>
<td>LINE 2</td>
</tr>
<tr>
<td>LINE 3</td>
</tr>
</tbody>
</table>

4. On the Message menu, highlight the desired line and then press **SELECT**.
**Using the Phone**

**Using a shared line**

Your phone may be configured to have one or more shared lines. This means that a group of phones, including yours, can make and receive calls on the same line. The shared line can have more than one programmable key assigned to it. Ask your system administrator for the configuration that applies to your deskset.

Incoming calls on a shared line will ring every deskset that shares that line. When someone answers the call, the other desksets stop ringing and return to idle mode. In contrast, calls on a private line will ring only your deskset.

Incoming calls on a shared line look identical to private-line calls, except that the **Forward** soft key does not appear on the incoming call screen.

**When to Use a Private Line Instead of a Shared Line**

Your system administrator should label your deskset feature keys according to the type of line. The labels should indicate which keys apply to the shared line(s) and which keys apply to private lines. In general, you should use private lines for direct calls to other desksets within your organisation. If you use a shared line to call other desksets, all the other desksets that use that line will ring.

**Call monitoring**

One of the main features of shared lines is the ability to monitor call activity. You can monitor the call activity by observing the Line key LED. On your deskset, the LED is steady orange when a call has been answered at another deskset, and flashes orange slowly when the user at another deskset puts a call on hold. See “Programmable feature key lights” on page 18.

**Putting a shared-line call on hold**

After you answer a call on a shared line, you have two options for putting that call on hold.

- You can put a call on hold by pressing the **HOLD** key. This puts a call on “normal” hold. On a shared line, this means that other shared-line users can see that the call is on hold, as indicated by the flashing orange Line key LED. Other users can retrieve the call by pressing the flashing Line key. Your deskset will return to idle mode. Putting a call on hold this way can be useful if you want to hand off the call to someone else, or if you want to pick up the held call at another deskset.

- You can also put a call on “private” hold, which means that other users cannot see that the call is on hold. Their Line key LEDs continue to show a steady orange, indicating that the call is active. This is useful if you plan to resume the held call on the same deskset.
Using the Phone

Putting a shared-line call on hold (continued)

When you transfer a call or start a conference call, the other call is put on private hold automatically. During the transfer or conference setup process, no other desksets can retrieve the call on hold.

As well, when you are on a call and you answer another incoming call or retrieve another call on hold, your first call is put on private hold automatically.

To put a call on private hold manually:

- Press and hold the HOLD key for 2 seconds.

“Barging in”

When you have a shared line, it may be possible to “barge in,” that is, join a call in progress at another deskset that uses that shared line. The result of barging in is that you create a “bridged call” between you and the people whose call you joined. You and the others can then converse. Note that any other shared-line user can barge in on the call as well.

Note: The ability to barge in on calls is a configurable setting for your deskset. Only your system administrator can enable this setting. Your deskset may have shared lines, but be unable to barge in on calls. If barging in is disabled on your deskset, pressing the key with the steady orange LED will do nothing.

Bridged calls differ from conference calls in that you can join a call in progress at any time. However, because the caller ID of the active call is not visible to you, other participants in the call may need to notify you of an appropriate time to join.

Bridged calls can also have any number of participants, unlike conference calls. The number of participants on a bridged call depends on the number of desksets sharing that line and may be limited by system or network capabilities.

To barge in on a call:

- Press the desired line key that has a steady orange LED, indicating an active call on a shared line.

  You join the call already in progress.

To leave the call, press End. The other participants can continue their bridged call.

Note: If you are unable to barge in on a call, it may be because the other call is not currently in progress. A line key with a steady orange LED can also indicate that the call is on private hold at the other deskset, or that the other deskset is dialling a number and no call is established yet.
Using the Phone

Busy lamp field

As with shared lines, you can monitor call activity using Busy Lamp Field (BLF) keys. However, BLF keys and LEDs represent activity on an individual deskset, not on a line. Keys configured for BLF allow you to monitor call activity for the extension only. You can use the BLF key as a quick dial key to call the extension and intercept ringing calls.

**Note:** Your system administrator sets up Busy Lamp Field keys. Your key labels should identify the BLF keys and which extensions they monitor. The BLF feature may not be available on your deskset.

For BLF LED states, see “Programmable feature key lights” on page 18.

**To dial a monitored extension:**

- Press the BLF key for that extension. The monitored extension can be idle, or have an active or held call.

  Your deskset dials the extension using the first available line key. When the other person answers, your deskset indicate two active calls: one active call on the line key that you dialled out on, and one active call on the BLF key of the monitored extension you called.

**To answer a call ringing at a monitored extension:**

- Press the flashing orange BLF key for the desired extension.

  Your deskset answers the call on the first available line key.
Using the Phone

Paging

Your phone supports two types of paging: server-based paging and multicast paging. An incoming page may interrupt any active calls you are on, depending on how your system administrator has configured the paging function.

To send a server-based page:

   11:09am 25/09/13
   Line 1
   Directory | Line | Call Log
   → Line 1
   Calling
   *37
   End

2. Follow the voice prompts to page.

To send a multicast page:
1. Press the Multicast Page feature key. You will hear a paging tone before your phone broadcasts a page to the assigned paging zone.

   11:09am 25/09/13
   Line 1
   Directory | Line | Call Log
   → Paging
   Marketing
   0:00:07
   End

2. Press End to terminate the page.

Automatic Call Distribution

If you are subscribed to Automatic Call Distribution (ACD), pressing the ACD feature key will display the ACD State Menu:

To set your ACD state:
1. Press the ACD feature key. The ACD State list menu appears.

   ACD State
   1. Sign In
   2. Available
   3. Unavailable

2. Press ▲ or ▼ to select the desired state, and then press SELECT. If you select “Unavailable”, then you will have the option of entering a reason code.
Phone Features

Using the Features menu

On the Features menu, you can manage incoming calls, use the Directory, access your messages, view your call history, and manage your speed dial numbers.

Navigating menus

To select a submenu on a numbered list, you can:

- Press ▲ or ▼ to highlight the desired menu, then press SELECT.
- Press the dial pad key that matches the number of the desired menu.

To access the Features menu:

1. When the phone is idle, press MENU. The Main Menu appears.
2. If necessary, press ▲ or ▼ to highlight Features, and then press SELECT. The Features menu appears.

The Features menu includes the following items:

<table>
<thead>
<tr>
<th>Setting</th>
<th>See page…</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Call</td>
<td>35</td>
<td>Manages how your phone handles incoming calls.</td>
</tr>
<tr>
<td>2. Directory</td>
<td>39</td>
<td>Stores contact information and call contacts.</td>
</tr>
<tr>
<td>3. Call history</td>
<td>42</td>
<td>Lists incoming and outgoing call information.</td>
</tr>
<tr>
<td>4. Message</td>
<td>29</td>
<td>Accesses your voicemail.</td>
</tr>
<tr>
<td>5. Speed dial</td>
<td>45</td>
<td>Accesses your list of speed dial numbers.</td>
</tr>
<tr>
<td>6. Local Call</td>
<td>46</td>
<td>Displays the Call Playback menu, for call recording review and playback (a microSD card must be installed and your administrator must enable call recording).</td>
</tr>
</tbody>
</table>
Phone Features

Using the Call menu

On the Call menu, you can manage how your phone handles incoming calls.

The settings available on the Call menu include:

<table>
<thead>
<tr>
<th>Setting</th>
<th>See page…</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Do Not Disturb</td>
<td>36</td>
<td>Silences incoming ringing and paging. Do Not Disturb (DND) is set on a per-line basis. The system administrator can enable you to answer incoming calls when DND is on. When DND answering is enabled, the Line key flashes for incoming calls and the incoming call screen appears. If DND answering is disabled, the incoming call will be terminated.</td>
</tr>
<tr>
<td>2. Call forward</td>
<td>36</td>
<td>Automatically forwards incoming calls depending on the setting. You can enable the following types of call forwarding:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Call forward always: incoming calls are forwarded immediately and the phone does not ring.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Call forward busy: incoming calls are forwarded if all your available lines are busy.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Call forward no ans: incoming calls are forwarded after the no answer delay expires.</td>
</tr>
<tr>
<td>3. Block anonymous</td>
<td>37</td>
<td>Enables the phone to reject incoming calls that have no caller ID.</td>
</tr>
<tr>
<td>4. Dial as anonymous</td>
<td>37</td>
<td>Enables the phone to make outgoing calls with the Caller ID hidden from the far end.</td>
</tr>
<tr>
<td>5. Missed call alert</td>
<td>38</td>
<td>Enables the missed call alert screen.</td>
</tr>
<tr>
<td>6. Call waiting</td>
<td>38</td>
<td>Enables or disables incoming call alerts while you are on another call.</td>
</tr>
</tbody>
</table>

To use the Call menu:

1. When the phone is idle, press **MENU**.
2. If necessary, press ▲ or ▼ to highlight **Features**, and then press **SELECT**.
3. If necessary, press ▲ or ▼ to highlight **Call**, and then press **SELECT**. The Call menu appears.
Phone Features

Using the Call menu (continued)

To set Do Not Disturb:
1. From the Call menu, if necessary, press ▲ or ▼ to highlight Do Not Disturb.
2. Press SELECT.
3. On the Do Not Disturb menu, highlight the line for which you want to turn Do Not Disturb On or Off.

```
<table>
<thead>
<tr>
<th>Line 1:</th>
<th>Off</th>
</tr>
</thead>
<tbody>
<tr>
<td>Line 2:</td>
<td>Off</td>
</tr>
</tbody>
</table>
```

4. When the desired line is highlighted, press ◀ or ▶ to turn Do Not Disturb On or Off.
5. Press Save.

When Do Not Disturb is on for your default line, 📞 appears on the idle screen.

To set Call forward:
1. From the Call menu, press ▼ to highlight Call forward.
2. Press SELECT.

The Call forward menu appears.

```
<table>
<thead>
<tr>
<th>Call forward</th>
</tr>
</thead>
<tbody>
<tr>
<td>LINE 1</td>
</tr>
<tr>
<td>LINE 2</td>
</tr>
<tr>
<td>LINE 3</td>
</tr>
</tbody>
</table>
```

3. Highlight the line for which you want to configure call forward settings, and then press SELECT.
4. On the next screen, press ▼ to highlight the desired option:
   - Call forward always
   - Call forward busy
   - Call forward no ans.

```
<table>
<thead>
<tr>
<th>LINE 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Call forward always</td>
</tr>
<tr>
<td>Call forward busy</td>
</tr>
<tr>
<td>Call forward no ans</td>
</tr>
</tbody>
</table>
```

5. Press SELECT.
Phone Features

Using the Call menu (continued)

6. On the next screen, press ▼ or ► to turn call forwarding On or Off.

   ![Call Forwarding]

   7. Press ▼.

   8. Enter the number to which you would like to forward calls.

   9. (If you selected Call forward no ans earlier) Press ▼.

   10. (If you selected Call forward no ans earlier) Press ▼ or ► to set the No answer delay between 1 to 10 rings.

   11. Press Save.

   When Call forward is on for your default line, □ appears on the idle screen.

   **Note:** Your system administrator can also configure programmable keys to turn Call forward always, Call forward busy, and Call forward no answer on or off.

   **To block anonymous callers:**

   1. From the Call menu, press ▼ to highlight Block anonymous.

   2. Press SELECT.

   The Block anonymous menu appears.

   ![Block Anonymous]

   3. Highlight the desired line, and then press ▼ or ► to turn anonymous call blocking On or Off for that line.

   4. Press Save.

   **To dial as an anonymous caller:**

   1. From the Call menu, press ▼ to highlight Dial as anonymous.

   2. Press SELECT.

   The Dial as anonymous menu appears.

   ![Dial as Anonymous]

   3. Highlight the desired line, and then press ▼ or ► to turn anonymous call dialling On or Off for that line.

   4. Press Save.
Phone Features

Using the Call menu (continued)

To enable missed call alerts:
1. From the Call menu, press ▼ to highlight Missed call alert.
2. Press SELECT.
   The Missed call alert menu appears.
   Missed call alert
   Show alert: Yes ▼
   Cancel Save
3. Press ◀ or ▶ to turn missed call alerts on or off.
4. Press Save.

To enable call waiting alerts:
1. From the Call menu, press ▼ to highlight Call waiting.
2. Press SELECT.
   The Call waiting menu appears.
   Call waiting
   Show alert: Yes ▼
   Cancel Save
3. Press ◀ or ▶ to turn call waiting alerts on or off.
4. Press Save.

When Show alert is on and you are on a call, incoming calls are displayed on the screen. When Show alert is off, incoming calls are rejected and no notification appears on the screen. See also “Call Waiting Settings” on page 65.
Phone Features

Using the local directory

You can store the names and phone numbers for up to 1000 contacts in the deskset directory. Once directory entries are saved, you can dial them directly from the directory. You can also search directory entries by first or last name.

When adding an entry, you can enter numbers for work, mobile, and other. You can also select a ringtone for that contact. Later, you can edit entries if their contact information changes.

To view the local directory:

1. When the phone is idle, press MENU.
2. With Features highlighted, press SELECT.
3. Press ▼ to highlight Directory, and then press SELECT.
   The Directories screen appears, listing all your available directories and the blacklist. Any directories other than Local are server-based and will vary with your installation. You can edit the Local directory and the blacklist.

   Directory
   1. Local
   2. Blacklist

4. With Local highlighted, press SELECT.
   The Local directory appears, showing the first entry (sorted alphabetically by first name).

   Local
   1/20 ▼
   1. Mary Williams
   Work: 2325551234

   Back LastNme Type

5. Press ▲ or ▼ to view other entries.

The following soft keys are available when viewing a directory entry:

<table>
<thead>
<tr>
<th>Back</th>
<th>Dial</th>

</thead>
<tbody>
<tr>
<td>Returns to Directory list screen</td>
<td>Dials the entry</td>
<td>Allows you to add a new entry</td>
<td>Sorts the list by last name from the top of the list</td>
<td>Allows you to change the entry</td>
<td>Deletes the entry</td>
<td>Displays the contact's other numbers: Work, Mobile, Other</td>
<td>Allows you to search the list alphabetically by first or last name</td>
<td>Deletes all entries</td>
</tr>
</tbody>
</table>
Phone Features

Using the local directory (continued)

To call a contact:
1. Press ▲ or ▼ or Search to view the desired directory entry.
2. To view other numbers for the entry, press ▼ Type  ▼.
3. When the desired number appears, press ▼ Dial  ▼.

Note: If you view a directory entry when you have already entered digits in dial mode, an Insert soft key appears instead of Dial. Press Insert to add the entry’s number onto the existing digits. You can use this feature when making a call, forwarding a call, transferring a call, and setting up a conference call.

To add a directory entry:
1. When viewing a directory entry, press ▼ or ▼ until the Add soft key appears.
2. Press ▼ Add  ▼.
   A blank directory entry appears.
3. Use the dial pad keys to enter the first name, last name, and contact numbers.
   • Press ▼ ABC ▼ to switch between entering upper-case letters, lower-case letters, and numbers.
   • Press ▼ Backspc ▼ to delete incorrect characters.
   • After completing a line, press ▼ to move to the next line.
4. When you have entered the desired information and selected the ringtone you want to use for this contact, press ▼ Save  ▼.

To edit a directory entry:
1. When viewing the desired directory entry, press ▼ or ▼ until the Edit soft key appears.
2. Press ▼ Edit  ▼.
   The directory entry edit screen appears.
3. Use the dial pad keys to change the first name, last name, and contact numbers as desired.
   • You can edit the name and numbers, and change the ringtone.
   • Press ▼ ABC ▼ to switch between entering upper-case letters, lower-case letters, and numbers.
   • Press ▼ Backspc ▼ to delete incorrect characters.
   • After completing a line, press ▼ to move to the next line.
4. Press ▼ Save  ▼.
Phone Features

Using the local directory (continued)

To search directory entries:
1. From the Directories screen or from a directory entry, press Search. The Local directory search screen appears.

   ![Local directory search screen]

2. To filter your search by first name or last name, press  or .
3. Press ▼ to move to the Search field.

   ![Search field]

4. Press a dial pad key to enter a letter for your first name or last name search. Press 2 once for A, or three times for C, for example.
5. Press Search. The deskset searches for the first name or last name beginning with the letter you entered.

The first entry found appears. If more than one entry was found, press ▲ or ▼ to view other entries.

To delete a directory entry:
1. Press ▲ or ▼ or Search to view the desired directory entry.
2. Press ◄ or ► until the Delete soft key appears.

   ![Directory entry screen]

3. Press Delete.
4. When the confirmation screen appears, press Yes.

To delete all directory entries:
1. From a directory entry, press ▲ or ▼ until the Del. all soft key appears.
2. Press Del. all.
3. When the confirmation screen appears, press Yes.
Phone Features

Blacklist

The directory also includes a blacklist, which is a list of numbers that cannot reach your phone. If you experience nuisance calls, you can add the callers’ contact information to the blacklist. Calls from blacklisted numbers will not ring your phone, or be recorded in your call history. The Blacklist can be viewed and edited in the same way as the Local directory but is a completely separate directory listing.

Call history

The call history provides available name and number information for the last 200 incoming and outgoing calls. The newest entries replace the oldest. You can view call history information for:

• All calls—all categories of calls
• Missed calls—incoming calls that were not answered
• Received calls—incoming calls that you answered, forwarded or rejected
• Dialled calls—all outgoing calls. You can use this as a redial list.

To view the call history:

1. When the phone is idle, press Menu.
2. If necessary, press ▲ or ▼ to highlight Features, then press SELECT.
3. Press ▲ or ▼ to highlight Call History, then press SELECT.
   The Call History screen appears.

   Call history
   ▼ 1. All calls
   ▼ 2. Missed calls
   Back Del. all View

4. Press ▼ to highlight the desired call history folder.
5. Press View to see call history entries in the highlighted folder.
   The first entry appears.

   11:09AM 01/01/13 1/76
   Mary Williams
   2325551234
   ⏯️ Delete ⬆️ Dial ⬇️ Edit Dial

   If the folder is empty, the message No entries to display. appears.
6. Press ▼ to view more entries.

The call history entry screen shows the time, date, name and number of the call, the number of entries in the folder, along with an icon indicating the type of call.
Phone Features

Call history (continued)

The following soft keys are available when viewing a call history entry:

<table>
<thead>
<tr>
<th>Delete</th>
<th>Deletes the entry</th>
<th>Dial</th>
<th>Dials the entry</th>
<th>Edit Dial</th>
<th>Displays the predial screen so you can edit the number before dialling</th>
</tr>
</thead>
<tbody>
<tr>
<td>Save</td>
<td>Saves the call information to the local directory</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

To call a call history entry:

1. While viewing the desired entry, press **Dial**. The phone dials the number immediately.
   –or–
   Press **Edit Dial**. The predial screen appears, allowing you to edit the number before pressing **Dial**.

   **Note:** If you view a call history entry when you have already entered digits in dial mode, an **Insert** soft key appears instead of **Dial**. Press **Insert** to add the entry’s number onto the existing digits. You can use this feature when making a call, forwarding a call, transferring a call, and setting up a conference call.

To add a call history entry to the directory:

1. While viewing the desired entry, press ← or → until the **Save** soft key appears.

   11:09AM 01/01/13 1/76 ▼
   Mary Williams
   2325551234 ▼
   Save

2. Press **Save**.
3. On the **Save to** menu, select the location to which you want to save the entry.
   - To save the entry to your directory, highlight **Local** and then press **SELECT**.
   - To save the entry to your blacklist, highlight **Blacklist** and then press **SELECT**.
4. The directory add/edit screen appears. The deskset automatically fills in the name and number, if available.

- If necessary, edit the name and number. Press ▼ to move the cursor to the next line.
- Press Backspc to delete incorrect characters.

5. Press Save to save the entry.

**To delete a single call history entry:**

1. While viewing the desired entry, press Delete.

**To delete multiple call history entries:**

1. While viewing the list of call history folders, press ▼ to highlight the folder for which you would like to delete all entries: All calls, Missed calls, Received calls, or Dialed calls.

2. Press Del. all.

3. When the confirmation screen appears, press Yes.
Phone Features

Speed Dial

The speed dial menu allows you to enter up to 10 numbers that you dial frequently. To dial a speed dial number, press and hold the dial pad key that matches the speed dial entry number (for entry 10, press and hold 0).

You can also enter speed dial numbers using the WebUI. See “Speed Dial” on page 71.

Entering speed dial numbers

To add a speed dial entry:

1. When the phone is idle, press Menu.
2. With Features highlighted, press SELECT.
3. Press ▼ to highlight Speed dial, and then press SELECT.
   The Speed dial menu appears.

   ![Speed dial menu](image)

4. Press ▼ to highlight a speed dial entry marked <Empty>.
5. Press Add .
   A blank speed dial entry appears.

   ![Blank speed dial entry](image)

6. Use the dial pad keys to enter the name and number.
   - Press 123 to switch between entering numbers, lower-case letters, and upper-case letters.
   - When you start entering characters, the Cancel soft key changes to Backspc. Press Backspc to delete incorrect characters.
   - After completing a line, press ▼ to move to the next line.
7. Press ▼ and then press ◀ or ▶ to select the line you want to use for this speed dial entry.

When you have entered the desired information, press Save .
Phone Features

Call recording

If you have the call recording feature available (a microSD card must be installed and your administrator must enable call recording), you will have a Record soft key available during an active call.

To record a call:

1. While on a call, press ◀ or ▶ until the Record soft key appears.

2. Press Record. You will hear the Record tone if the tone has been enabled by your administrator, and the message “Recording call...” appears briefly.

3. To stop recording, press Stop or end the call. You will hear the Record tone if the tone has been enabled by your administrator, and the message “Recording stopped.” appears briefly.

Listening to call recordings

Recordings can be played back from the Call Playback menu, available through the Features menu.

To listen to your recordings:

1. When the phone is idle, press MENU.
2. With Features highlighted, press SELECT.
3. Press ▼ to highlight Local Call Recording, and then press SELECT. The Call playback menu appears. Each recording is named according to its date (YYMMDD), time (HHhMM), and call ID.

4. If necessary, press ▼ to select the desired recording.
5. Press **Play** to listen to the recording. The recording playback screen appears and the message begins playing.

```
160503_02h34_2325550178...
Clip length: 0:24
Playing...
Pause ▼ Jump ▼ Jump ▲
```

6. While the recording is playing, you can press:
   - **Pause** to pause playback.
   - **Jump** to move forward or backward 8 seconds at a time.
   - **Back** to cancel playback and return to the Call playback menu.

The following soft keys are available on the Call playback menu:

<table>
<thead>
<tr>
<th>Info</th>
<th>Displays the Call Information screen, showing the time, date and call information of the selected recording. You can also play or delete the recording from this screen.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delete</td>
<td>Immediately deletes the highlighted recording.</td>
</tr>
<tr>
<td>Play</td>
<td>Displays the playback screen and immediately begins playing the recording.</td>
</tr>
</tbody>
</table>

**Transferring call recordings to a computer**

Eject the microSD card before using the card to transfer the sound files to a computer.

**To eject the microSD card:**

1. When the phone is idle, press **MENU**.
2. Press ▼ to highlight **User settings**, and then press **SELECT**.
3. Press ▼ to highlight **SD card**, and then press **SELECT**.

```
User settings ▲
  5. DECT headset
  6. DECT handset
  7. SD card
```
4. On the SD card menu, press **Eject ▲**.

```
Total memory: 16GB
Available memory: 7.2GB
```

The message “It is now safe to eject your SD card” appears.

5. Press down on the SD card to release it, and then remove the SD card from the phone.
Cordless Headset

Registering an optional cordless headset

You can register one cordless headset to a VSP726A deskset. When a deskset has a cordless accessory, the deskset and headset are all part of the same extension, and only one device can be used at a time.

**Note**: The headset must be in the charger, otherwise registration cannot proceed.

**To register the cordless headset:**

1. When the phone is idle, press **Menu**.
2. Press ▼ to highlight **User Settings**, and then press **SELECT**.
3. Press ▼ to highlight **DECT headset**, and then press **SELECT**.
   The DECT headset menu appears.

   ![DECT headset menu]

   1. **Register**
   2. **Deregister**

4. Lift the cordless headset out of its charging base, and then place it back in the charger.
5. With **Register** highlighted, press **SELECT** on the deskset. **Registering...** appears while the deskset searches for the headset.

   When registration is complete, **Registration succeeded** appears and the ON/OFF light on the cordless headset turns solid blue.

   The DECT headset menu appears.

**Note**: Registration can be terminated by pressing **CANCEL** on the deskset.

If the cordless headset was registered to another deskset, it must be deregistered first. See “Deregistering a cordless headset” on page 49.
Cordless Headset

Deregistering a cordless headset

You must deregister a cordless headset from its original deskset before you can register it to a different deskset.

To deregister a cordless headset:
1. When the phone to which the headset is registered is idle, press Menu.
2. Press ▼ to highlight User Settings, and then press SELECT.
3. Press ▼ to highlight DECT Headset, and then press SELECT. The DECT headset menu appears.
4. Press ▼ to highlight Deregister, and then press Select .

The deskset screen displays DECT headset is deregistered. The cordless headset ON/OFF light flashes twice every five seconds to indicate it is not registered.

The DECT headset menu appears.

Deregistering the cordless headset without the deskset

Cordless headsets can also be deregistered using the headset. You can use this method when you cannot use the deskset for standard deregistration. The deskset may be out of range or may have been removed from the system.

To deregister a VSP500A headset, on the headset, press VOL +, POWER, VOL −, POWER, VOL +, VOL −, POWER.

Cordless accessory registration and deregistration time-out

If the cordless device is registered to another deskset or telephone, it must be deregistered first. See “Deregistering a cordless headset”.

For security reasons, the registration process on both the deskset and the cordless accessory terminates after the time-out period of two minutes if registration is not successful.

If the registration process times out on the cordless accessory, the cordless accessory resets itself. If the registration process times out on the deskset, it displays Registration Failed and returns to Idle mode.

If cordless headset registration fails, the ON/OFF light on the headset flashes twice every five seconds. To reset the headset, lift the headset out of its charging base, place it back in the charger, and try the registration process again.
Cordless Handset

Registering an optional cordless handset

You can register one VSP601A DECT cordless handset to a VSP726A deskset. When a deskset has a cordless accessory, the deskset and handset are all part of the same extension, and only one device can be used at a time.

Note: Make sure the handset has a charged battery before proceeding. Also make sure the deskset is powered on and is idle.

To register the cordless handset:

1. Press MENU on the handset. The Main Menu appears.
2. Press ▼ to scroll to User settings and press SELECT.
3. Press ▼ to scroll to Registration and press SELECT.
4. With Handset highlighted, press SELECT. The handset asks you which device you want to register to. Press DESKSET.
5. The handset screen displays instructions. Press NEXT to continue reading the instructions.
7. Press ▼ to highlight User Settings, and then press SELECT.
8. Press ▼ to highlight DECT handset, and then press SELECT. The DECT handset menu appears:

<table>
<thead>
<tr>
<th>DECT handset</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Register</td>
</tr>
<tr>
<td>2. Deregister</td>
</tr>
</tbody>
</table>

9. With Register highlighted, press SELECT on the deskset. Registering... appears while the deskset searches for the handset.
10. Press the # key on the handset. The screen shows Please wait...

The registration process takes up to 10 seconds. When registration is complete, Registration succeeded appears on the deskset. The handset displays Handset Registered.

If the handset fails to register, place it in the charger for a few seconds, remove it and repeat the registration procedure.
Cordless Handset

Deregistering the cordless handset

Before using the cordless handset with a different deskset, you must deregister the handset from the device to which it is currently registered.

To deregister using the handset:
1. Press **MENU** on the handset. The Main Menu appears.
2. Press ▼ to scroll to **User settings** and press **SELECT**.
3. Press ▼ to scroll to **Registration** and press **SELECT**.
4. Press ▼ to highlight **Deregistration** and press **SELECT**.
5. Enter the PIN and then press **OK** to begin deregistration. The default PIN is 0000.

To deregister using the deskset:
1. On the deskset, press **MENU** when idle.
2. Press ▼ to highlight **User Settings**, and then press **SELECT**.
3. Press ▼ to highlight **DECT handset**, and then press **SELECT**. The DECT handset menu appears.
4. Press ▼ to highlight **Deregister**, then press **Select**
5. Press **Yes** to confirm deregistration.

The deregistration process takes up to 10 seconds to complete. The deskset screen displays **DECT handset is deregistered**.

**Note:** The handset enters an energy-saving charging mode after being deregistered. All cordless telephone functions except handset-battery charging are disabled. Energy-saving charging mode is deactivated after the handset registers to the deskset.
Finding the firmware version

To view the firmware version of your phone:

1. When the phone is idle, press **MENU**.
2. On the Main menu, press ▼ to highlight **Status**, and then press **SELECT**.
3. On the Status screen, press ▼ to highlight **Product Info**, and then press **SELECT**.

<table>
<thead>
<tr>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Network</td>
</tr>
<tr>
<td>2. Line</td>
</tr>
<tr>
<td>3. Product Info</td>
</tr>
</tbody>
</table>

4. On the Product Info screen, press ▼ until **Firmware Ver.** appears.

<table>
<thead>
<tr>
<th>Product Info</th>
</tr>
</thead>
<tbody>
<tr>
<td>MAC: 1011A019FB0D</td>
</tr>
<tr>
<td>Boot Version: 1.x.x</td>
</tr>
<tr>
<td><strong>Firmware Ver.</strong>: 1.x.x</td>
</tr>
</tbody>
</table>
Configuring the Phone

You can configure the phone using one of two methods:

1. The User Settings menu on the phone.
2. The WebUI, which you access using your Internet browser.

This section describes the User Settings menu. For information about the WebUI, see page 60.

Using the User Settings menu

To view the User Settings menu:

1. Press MENU.
2. Press ▼ to highlight User Settings, and then press SELECT, or press 3 (User Settings) on the dial pad.

The User Settings menu appears.

<table>
<thead>
<tr>

Configuring the Phone

Preferences

Use the Preferences menu to set the language, date and time formats, and restart the phone.

To use the Preferences menu:

1. Press MENU, then select User Settings, or press 3. The User Settings menu appears.

2. On the User Settings menu, ensure that Preferences is highlighted and then press SELECT. The Preferences menu appears.

3. Press ▲ or ▼ to highlight the desired option, and then press SELECT. The available options are:
   - Language
   - Date & Time
   - Set Key Unlock PIN
   - Hide in-call digits
   - Restart phone

Setting the language

1. From the Preferences menu, press ▲ or ▼ to highlight Language, and then press SELECT. The Language menu appears.

2. Press ▲ or ▼ to highlight the desired language.

3. Press SELECT.

Setting the date and time

1. From the Preferences menu, press ▼ to highlight Date & Time, and then press SELECT. The Date & Time menu appears.
Configuring the Phone

Setting the date and time (continued)

To set the time format:
1. From the Date & Time menu, ensure that Clock Time is highlighted.
2. Press ▲ or ▼ to select a 12-hour clock (am/pm) or 24-hour clock.
3. Press Save.

To set the date format that appears on the idle screen:
1. From the Date & Time menu, press ▼ to highlight Clock date.
2. Press ▲ or ▼ to select the desired date format (DD/MM/YY, MM/DD/YY, YY/MM/DD).
3. Press Save.

To set the Time Zone:
1. From the Date & Time menu, press ▼ to highlight Time Zone.
2. Press Edit.
3. Press ▲ or ▼ to select a setting. The time zone is set as an offset from GMT. For example, EST is -5, and PST is -8.
4. Press Save.

To enable or disable Daylight Savings Time adjustment:
1. From the Date & Time menu, press ▼ to highlight DST.
2. Press ▲ or ▼ to select Enabled or Disabled.
3. Press Save.

To enable or disable the NTP (Network Time Protocol) server:
1. From the Date & Time menu, press ▼ to highlight NTP server.
2. Press ▲ or ▼ to select Enabled or Disabled.
3. Press Save.

Note: If the NTP server is disabled, you must manually set the time and date. This setting is valid only if the system administrator has already configured the Network Time settings. For more information, see the VSP726A Deskset Administrator and Provisioning Guide.

To configure the NTP Server:
1. From the Date & Time menu, press ▼ to highlight NTP and then press Edit.
2. On the NTP menu, enter the URL of the NTP server. Press the ABC key to switch between entering upper case letters, lower case letters, and numbers.
3. Press Save.
To manually set the Year, Month, Day, Hour and Minute:
1. From the Date & Time menu, press ▼ to highlight Set manually.
2. Press SELECT.
   **Note**: If the NTP server is enabled, you cannot modify this setting. See “To enable or disable the NTP (Network Time Protocol) server:” on page 55.
3. For each setting, press ◀ or ▶ to select the desired setting, and then press ▼ to move to the next line.
4. When you have finished, press Save.

**Setting the Key Unlock PIN**

If you are authorised to do so, you can set the PIN to unlock the phone. The Phone Lock feature restricts certain hard keys and features unless you enter a PIN. There are three escalating modes of lockout:

- **Restricted Config** locks out the menu and voicemail.
- **Restricted Call** locks out all advanced calling features in addition to the menu and voicemail. The phone operates only in single call, single account mode.
- **Emergency Call Only** locks out all outgoing calls except emergency calls.

Incoming calls are allowed in all modes. If your phone is locked unnecessarily, see your system administrator.

**To change the Unlock PIN:**
1. From the Preferences menu, press ▼ to highlight Set Key Unlock PIN, and then press SELECT.
   The Set Key Unlock PIN menu appears.
2. With current PIN highlighted, press Edit.
3. Enter the current PIN and then press ▼.
4. Enter the new PIN and then press ▼.
5. Re-enter the new PIN and then press Save.

**Hiding In-Call Digits**

You can enable the phone to show or hide any additional digits (PIN numbers and pass codes, for example) that you enter during a call. By default, in-call digits are shown.

**To show or hide in-call digits:**
1. From the Preferences menu, press ▼ to highlight Hide In-Call Digits, and then press SELECT.
   The Hide in-call digits menu appears.
2. Press ◀ or ▶ to select Shown or Hidden.
3. Press Save.
Display

Use the Display menu to set screen appearance and backlight behaviour.

To use the Display menu:
1. Press **MENU**, then select **User Settings**, or press 3.
2. On the User Settings menu, press ▼ to highlight **Display**, and then press **SELECT**.
   The Display menu appears.

   ![Display menu](image)

3. Press ▲ or ▼ to highlight the desired option, and then press **SELECT**. The available options are:
   - Contrast
   - Backlight ON
   - Backlight idle
   - Timeout

To set the contrast level:
1. From the Display menu, ensure that **Contrast** is highlighted.
2. Press ◀ or ► to set the contrast level from 1 to 7 (4 is the default setting).
3. Press **Save**.

To set the backlight level that applies when the phone is active:
1. From the Display menu, press ▼ to highlight **Backlight ON**.
2. Press ◀ or ► to select Off, Low, Medium, or High (High is the default setting).
3. Press **Save**.

To set the backlight level that applies when the phone is idle:
1. From the Display menu, press ▼ to highlight **Backlight idle**.
2. Press ◀ or ► to select Off, Low, Medium, or High (Off is the default setting).
3. Press **Save**.

To set the backlight off timeout:
1. From the Display menu, press ▼ to highlight **Timeout**.
2. Press ◀ or ► to select between 10 and 60 seconds at 5-second intervals (30 seconds is the default setting).
3. Press **Save**.
Configuring the Phone

Audio

Use the Audio menu to pick one of ten ringer tones, turn key tones on and off, or select the default audio mode.

Note: To adjust the ringer volume, press the deskset VOLUME ▼ or ▲ keys while the phone is idle.

To use the Audio menu:

1. Press MENU, then select User Settings, or press 3.

2. On the User Settings menu, press ▼ to highlight Audio, and then press SELECT.
   The Audio menu appears.
   
<table>
<thead>
<tr>
<th>Audio</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Ringer tone</td>
</tr>
<tr>
<td>2. Key tone</td>
</tr>
<tr>
<td>3. Audio mode</td>
</tr>
</tbody>
</table>

3. Press ▲ or ▼ to highlight the desired option, and then press SELECT. The available options are:
   - Ringer tone
   - Key tone
   - Audio mode

To select different ringer tones for each line:

1. From the Audio menu, ensure that Ringer tone is highlighted and then press Select.

2. On the Ringer tone menu, press ▼ (if necessary) to highlight a line for which to select a ringer tone and then press Select.

<table>
<thead>
<tr>
<th>Ringer tone</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. LINE 1</td>
</tr>
<tr>
<td>2. LINE 2</td>
</tr>
<tr>
<td>3. LINE 3</td>
</tr>
</tbody>
</table>

3. On the selected line screen, press ◀ or ▶ to select one of ten ringer tones. The default is 1. Ringer tone samples play when selected.

<table>
<thead>
<tr>
<th>LINE 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ringer tone: Ringtone 1 ◀</td>
</tr>
<tr>
<td></td>
</tr>
</tbody>
</table>

4. After selecting the desired ringer tone, press Save. To exit without saving a new ringer tone, press Cancel.
Configuring the Phone

To set the key tone:
1. From the Audio menu, press ▼ to highlight Key tone and then press SELECT. The Key tone menu appears.

   **Key tone**
   
   **Key tone:** Off  ▲
   
   **Cancel**  **Save**

2. On the Key tone menu, press ◀ or ▶ to turn key tones on or off. When off, key presses are silent.
3. Press **Save**.

To set the audio mode:
1. From the Audio menu, press ▼ to highlight Audio mode and then press SELECT. The Audio mode menu appears.

   **Audio mode**
   
   1. Speaker  2. Headset

2. On the Audio mode menu, press ▼ to highlight the desired audio mode (Speaker, Headset, or DECT Headset).
3. Press **SELECT**.

When you press a Line key or **Answer**, the call is started or answered using the selected audio mode. Lifting the handset takes priority in all instances.

Configuring the programmable keys

You can configure the Programmable Keys on the Deskset. You can also configure these keys on the WebUI (see “Programmable Feature Keys” on page 66).

To configure the programmable keys:
1. Press **MENU**, then select User Settings, or press 3. The User Settings menu appears.
2. Press ▼ to highlight Programmable keys, and then press SELECT. The Programmable keys menu appears.
3. Press ▼ to highlight the key to configure, and then press **Edit**.
4. Select a PFK type, and then press **SELECT**. Depending on the PFK type, the screen may prompt you to configure additional settings. For more details on PFK types, see “Programmable Feature Keys” on page 66.
Using the WebUI

Use an Internet browser to access the Web User Interface (WebUI) that resides on your deskset. After you log on to the WebUI, you can configure the following features:

- Call Settings
- User Preferences
- Programmable Keys
- Speed Dial
- Local Directory
- Blacklist
- Call History
- User Password

The WebUI also has a Status page, where you can view status and information.

To access the WebUI:

1. Ensure that your computer is connected to the same network as your deskset. Your computer may already be connected to the network through the PC port on the back of your deskset.

2. Find the IP address of your phone:
   a. When the phone is idle, press **MENU**.
   b. Press ▼ to highlight **Status**, and then press **SELECT**. The Status menu appears.

<table>
<thead>
<tr>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Network</td>
</tr>
<tr>
<td>2. Line</td>
</tr>
<tr>
<td>3. Product Info</td>
</tr>
</tbody>
</table>

   c. With **Network** highlighted, press **SELECT**. The **Network** screen appears.
   d. On the Network screen, highlight the IP version in the use: **IPv4** or **IPv6** and then press **SELECT**.
   e. On the **IPv4** or **IPv6** status screen, note the IP Address.

<table>
<thead>
<tr>
<th>IPv4</th>
</tr>
</thead>
<tbody>
<tr>
<td>IP type: DHCP</td>
</tr>
<tr>
<td>IP: 192.168.100.100</td>
</tr>
<tr>
<td>Subnet Mask: 255.255.255.255</td>
</tr>
</tbody>
</table>

3. On your computer, open an Internet browser. Depending on your browser, some of the pages presented here may look different and have different controls.

4. Type the phone IP address in the browser address bar and press **ENTER** on your computer keyboard. A Login page appears.
5. Under **User Name**, enter `user`.

6. Under **Password**, enter `user`, or your own password, if you have created one. You can create or change a password after you log on.

7. Click **Log In**. The WebUI appears.

Click topics from the navigation bar at the top of the page, and then click the desired setting on the left side of the WebUI to see the page for that setting. You view and change settings in two different types of fields: drop-down lists and entry fields into which you type information. For your security, the WebUI times out after 10 minutes, so if it is idle for that time, you must log on again.

The remaining procedures in this section assume that you have already logged on to the WebUI.

**Status**

The Status page shows:

- **General** information about your phone, including model, MAC address, and firmware version.
- **Account Status** information about your SIP account registration.
- **IPv4** and **IPv6** network information regarding your phone’s network address and network connection.
- **Cordless Status** indicating whether a cordless headset is registered to the deskset.

The Status page has no settings that you can change. You may need some of the status information for troubleshooting purposes.

Call Settings

To view the call settings, click **SYSTEM** in the WebUI header, and then click **Call Settings** in the sidebar. You can configure call settings for each account that is available to your phone. Click **Account 1**, **Account 2**, and so on to select the call settings page for the desired account.

Call Settings include Do Not Disturb and Call Forward settings. You can also set Do Not Disturb and Call Forward using the desket. See “Using the Call menu” on page 35.

When you have finished changing settings on this page, click **Save** to save them.

Programmable Feature Keys

The deskset has 12 dual-function programmable keys. You can assign up to 24 functions to the programmable keys on the Programmable Keys page.

Keys can have identical functions, depending on the “Type” of key. For example, you can assign several “Line”-type keys to Account 1 so that you can manage multiple calls on Account 1. You can also assign multiple Quick Dial keys.

For the programmable key default settings, see “Programmable keys” on page 11.

### WebUI

#### Speed Dial

The speed dial keys are used for dialling numbers with one key press. To view the speed dial keys, click SYSTEM in the WebUI header, and then click **Speed Dial** in the sidebar.

On the Speed Dial page, you can enter up to 10 numbers that you dial frequently. To dial a speed dial number, press and hold the dial pad key that matches the speed dial entry number (for entry 10, press 0). For each speed dial number you enter, you must assign the account on which the number will be dialled out.

You can also add speed dial entries using the deskset. The Speed dial list is accessed through the Features menu. See “Phone Features” on page 45.

After entering information on this page, click **Save** to save it.

To enter speed dial numbers:

1. In the **Name** column, enter a speed dial label for the desired key.
2. In the **Value** column, enter a phone number for the desired key.
3. In the **Account** column, select the account that this speed dial number will use.
4. Click **Save**.
WebUI

Directory

To view the local directory, click **CONTACTS** in the WebUI header, and then click **Local directory** in the sidebar.

On the Local Directory page, you can manage your local directory entries. You can sort, edit, delete, and add contact information for up to 1000 entries. The page also allows you to export your phone’s local directory or import a local directory file. The export function lets you back up your contacts to your computer.

Phone numbers appear as links. If your service provider’s **click to dial** feature is enabled, you can dial a number by clicking its link.

The Local Directory lists entries across multiple pages. Click **Next**, **First**, **Last**, or a page number to view the desired page of entries.

**Note:** You can also use the phone menu to manage your local directory entries. For more information, see “Using the local directory” on page 39.

Your administrator can create more directories, e.g. Remote XML phonebook and LDAP.
Local Directory

</tbody>
</table>

3. **Click Save.**
To edit a directory entry:

1. Click Edit for the entry you want to edit.
   The Edit Local Directory Entry page appears.

2. Edit or add the desired information.
3. Click Save.

Import Local Directory

You can import an existing local directory file. Importing a directory file replaces all your previous local directory entries. After importing a directory file, you can add, edit, or delete entries as desired.

Note: Directory files are .xml files containing contacts and contact information. For more information about creating or editing a directory file, consult your system administrator.

To import a local directory file:

1. Click Choose File.
2. In the Choose File to Upload window, navigate to the directory file.
3. Click the file, and then click Open.
4. On the WebUI, click Import.

Export Local Directory

You can export the directory and save it as an .xml file on your computer.

To export the local directory:

1. Click Export.
2. At your browser’s prompt, save the file to the desired location on your computer.
WebUI

Configuration

On the Configuration page you can reset your password, configure PIN masking, and configure the phone lock feature.

To change the User password:

1. Enter the old password (for a new VSP726A, the default password is user).
2. Enter and re-enter a new password. The password is case sensitive and can consist of both numbers and letters (to a maximum of 15 characters).
3. Click Save.

PIN Masking

The PIN masking feature allows you to hide PIN numbers during call operation. The different types of PIN masking are:

- Hide DTMF digits—when Hide DTMF is enabled, PIN numbers entered during an Active Call are automatically masked.
- Password Dial—when Password Dial is enabled, PIN numbers entered as part of the dial string are hidden. For example, when entering numbers in Pre-Dial or Dial mode, PIN numbers are automatically masked.

PIN numbers in a dial string are masked in Pre-Dial and Dial modes (including variants of these modes, such as Transfer Setup, Conference Setup, and Incoming Call Forward Setup).

PIN numbers in a dial string are masked in Pre-Dial and Dial modes (including variants of these modes, such as Transfer Setup, Conference Setup, and Incoming Call Forward Setup).
<table>
<thead>
<tr>
<th>Setting</th>

<td>Enable to add a one-second delay before PIN numbers are masked. By default, the PIN number is masked immediately.</td>
</tr>
<tr>
<td>Password Dial Prefix</td>
<td>Enter the prefix that serves as an indicator that the next x digits are masked (x being equal to the Password Dial Length). Only the first matched Prefix initiates PIN masking. If additional instances of the Password Dial Prefix appear elsewhere within the dial string, they are ignored.</td>
</tr>
<tr>
<td>Password Dial Length</td>
<td>Enter the PIN number length. All digits within this length are masked. Any digits beyond this length are not masked. For example, if the Password Prefix is 99 and the Password Dial Length is 3, then 9912345 will be rendered as 99***45.</td>
</tr>
</tbody>
</table>

**Phone Lock**

You can reset the PIN that you enter to unlock the phone when call restriction is enabled.

**To change the Phone Lock PIN:**

1. Enter the old PIN.
2. Enter and re-enter a new PIN. The password is case sensitive and can consist of both numbers and letters (to a maximum of 15 characters).
3. Click **Save**.
Troubleshooting

If you have difficulty with your telephone, please try the suggestions below. For customer service, please contact your distributor or dealer.

General issues

Screen is blank.

- Ensure power is connected. If powered by an AC adapter, check that adapter is plugged into a wall socket and the Deskset power jack. If powered by PoE, ensure that the network switch is providing power through the correct ports.

The DECT headset doesn't register. “Registration failed” appears on the screen.

- Deregister the headset from the deskset to which it had been registered.
- Remove and replace the headset in its charger before pressing Register on the deskset.

Intercom calls (Pages) are not received.

- Your phone can be configured to answer intercom calls (pages) automatically. See your system administrator if your phone doesn’t answer intercom calls automatically.

Calls are answered on the headset rather than the speakerphone after I press a Line key or Answer to answer a call.

- Change the audio mode from Headset to Speaker. See “To set the audio mode:” on page 59.

Incoming calls do not ring on the deskset when using a cordless handset.

- If you are on a call using the handset, then additional incoming calls will emit a call waiting tone on the handset, but the deskset ringer will be silent.

My computer can’t connect to the network after plugging the Ethernet cable through the PC port.

- Make sure the deskset is connected to power. The PC port does not work when the deskset does not have power source or during a power outage.
- Make sure you plug the Ethernet cable connected to the router into the deskset Ethernet port and the Ethernet cable connected to the computer into the deskset PC port.

Maintenance

Taking care of your telephone

• Your telephone contains sophisticated electronic parts, so you must treat it with care.
• Avoid rough treatment.
• Place the corded handset down gently.
• Save the original packing materials to protect your telephone base if you ever need to ship it.

Avoid water

• You can damage your telephone if it gets wet. Do not use the corded handset in the rain, or handle it with wet hands. Do not install the telephone near a sink, bathtub or shower.

Electrical storms

• Electrical storms can sometimes cause power surges harmful to electronic equipment. For your own safety, take caution when using electric appliances during storms.

Cleaning your telephone

• Your telephone has a durable plastic casing that should retain its luster for many years. Clean it only with a soft cloth slightly dampened with water or a mild soap.
• Do not use excess water or cleaning solvents of any kind.

Remember that electrical appliances can cause serious injury if used when you are wet or standing in water. If the telephone should fall into water, DO NOT RETRIEVE IT UNTIL YOU UNPLUG THE POWER CORD AND NETWORK CABLE FROM THE WALL, then pull the unit out by the unplugged cords.
